Econ 117b. Introduction to Data Analysis and Econometrics

- **Day / time:** M/W 9:00 - 10:15 am
- **Course Type:** Undergraduate
- **Course term:** Spring
- **Year:** 2018
- **Instructor(s):** John Eric Humphries

Core course

Introduction to data analysis from the beginning of the econometrics sequence; exposure to modern empirical economics; and development of credible economic analysis. This course emphasizes working directly and early with data, through such economic examples as studies of environmental/natural resource economics, intergenerational mobility, discrimination, and finance. Topics include: probability, statistics, and sampling; selection, causation and causal inference; regression and model specification; and machine learning and big data.

Prerequisites: ECON 108, 110, 115, or equivalent and familiarity with single variable calculus. Students who have taken 131 will not receive major credit for 117

**Undergrad Course Category:** Core

**Methodology**

**Course Description:** Course Description

**Prerequisite List:** Only intro micro as prerequisite
