PROGRAMS OF STUDY

~~Master's, Ph.D., Economics, Finance, Health Economics, International Development Economics, Law, Management, Microeconomics, Political Economy, Public Policy, and Statistics. The Department of Economics and the Center for International Growth Center offers a one-year MA program in [International and Development Economics](#).~~

Doctoral students are expected to devote their full energies to course work and preparation for the qualifying examinations in the first years, and dissertation research and writing in the final years of graduate study. There is no part-time study available to applicants to the Department of Economics.

Qualified individuals who wish to study at the graduate level but not pursue a degree may be admitted to the Division of Special Registration (DSR) as "special students." Admission to this program is for one term or one year only and carries with it no commitment for further study. These students are not eligible for financial aid or loans. Applicants interested should apply in the same fashion as for full-time study.

Students may apply for admission to only one department or program within the Graduate School per year. Students may take one or more courses in a related department, and are often advised by faculty members from more than one department during their dissertation research. Students in the Graduate School, may, with permission, take advantage of course or research opportunities in Yale College and in the professional schools.

The Department of Economics offers a joint J.D./Ph.D. degree with the Yale Law School. Students must apply to and be admitted to the Yale Law School independently of the Graduate School. Applicants may apply to both schools at the same time or they may enter one school and apply to the second during their first year of study. A separate application is required for each school, and each makes its own admission decision. Students who apply simultaneously to two schools should indicate that they are doing so on both applications. For information on the Yale Law School see the following web site: www.law.yale.edu/yls/admis-jdindex.htm.

The Yale Graduate School does not admit transfer students. The presumption is that students who receive a Yale doctoral degree do their studies at Yale. Students currently enrolled in a doctoral program elsewhere who wish to apply to a Yale doctoral program may do so through the normal admissions procedure. They must meet all the application requirements, including the deadline for submission. Some very successful students have entered the Yale program in this way. Such students may petition the Economics Department and Graduate School to waive a portion of the Ph.D. course requirement (normally a maximum of three courses) in recognition of previous graduate-level work done at Yale or elsewhere. All other requirements, including the comprehensive examination, the economic history requirement, the oral examination, and the econometrics paper, must be completed at Yale. Students who enter the program from another doctoral program receive the full six-year financial aid package.

~~Black, Hispanic, and Asian students receive a stipend that covers the cost of tuition, books, and living expenses. Cornell, Columbia, and Princeton students receive a stipend that covers the cost of tuition, books, and living expenses.~~

A comprehensive description of academic rules and regulations of the Yale Graduate School will be made available to students when they are registered. The Programs and Policies booklet may be found on the Internet at the [Graduate School](#) website.
