

Flexible Pay, Bargaining, and The Gender Wage Gap

Closed to further applications

Faculty Member: [Barbara Biasi](#)

Proposal Description:

The project involves many different components and requires a diverse set of skills. We will need help developing and administering the survey, making sure we maximize the response rate. This includes developing a comprehensive roster of all teachers in all districts, writing the survey questions, and reaching out to teachers. We will also need support analyzing and describing the data using standard statistical softwares. Applicants should send a CV and a full transcript.

Requisite Skills and Qualifications:

The ideal candidate should be comfortable handling these tasks, be able to scrape websites to build the teachers' rosters, be familiar with Stata (Stata proficiency is a plus) and be able to summarize key variables, build graphs to visualize interesting patterns, and perform basic statistical analyses.
