Econ 447b. Networks and Development

Day / time: M/W 1:00 - 2:15 pm  
Course Type: Undergraduate  
Course term: Spring  
Instructor(s): Kaivan Munshi

This course examines the emerging literature on networks and economic development. This course is divided into four sections: (i) Commitment – how communities can harness their pre-existing social connections to circumvent market imperfections in developing economies. (ii) Labor markets and Migration – how community networks can both facilitate and hinder the mobility of their members. (iii) Inter-group Interactions – how communities interact with each other in developing economies and societies. (iv) How information spreads, through social connections, in developing economies. Apart from providing a particular perspective on development, an additional objective of this course will be to demonstrate the use of economic theory in informing empirical research.

Prerequisites: Intermediate Microeconomics, Introductory Econometrics and Data Analysis.

Also [Econ 733]

Semester offered: Spring  
Undergrad Course Category: Development
