

### How do I connect to Yale resources via Yale VPN while off-campus?

Yale Virtual Private Network (VPN) is a way to securely access Yale's restricted services and licensed e-resources (e.g. e-journals such as JAMA, or databases such as ArtSTOR) on the University network from a non-Yale internet source. VPN is also required for remote access to on-campus workstations - via Remote Desktop Protocol (RDP). While VPN provides excellent network security, it should only be used from an appropriately secured computing device.

To connect to VPN do the following:

1. Download and install the free VPN software (Cisco AnyConnect) from the [Yale Software Library](#)
2. Launch AnyConnect to access any Yale resources
3. Enter the address `access.yale.edu` and then click Connect in the AnyConnect window.
4. Enter your NetID and NetID password when prompted.
5. Enter the Multifactor Authentication (MFA) code from the [DUO app](#)

Yale VPN/MFA Connection --Instructions and Information  
For "Multifactor Authentication" enter your authentication  
passcode  
or type one of the following:  
"push" to receive a push notification to your smart phone  
(requires Duo mobile app)  
"sms" to receive a verification passcode via text message  
"phone" to receive a phone call  
For instructions and information on Multifactor  
Authentication, refer to:  
[http://its.yale.edu/secure-computing/multifactor-  
authentication-yale](http://its.yale.edu/secure-computing/multifactor-authentication-yale)  
For help, contact the ITS Help Desk, [helpdesk@yale.edu](mailto:helpdesk@yale.edu) or

OK Cancel

For additional assistance with VPN or the Multifactor Authentication DUO app, contact the [Yale ITS help desk](#).

NOTE: VPN is not necessary for every application. See [ITS guidelines](#) for using VPN.
