Econometrics

Subject Code (deprecated): ECON
Course Number: 136
Section Number: 01
Description:
Continuation of ECON 135 with a focus on econometric theory and practice: problems that arise from the specification, estimation, and interpretation of models of economic behavior. Topics include classical regression and simultaneous equations models; panel data; and limited dependent variables. Recommended for students considering graduate study in economics.

Instructor(s) from Econ Site: Yuichi Kitamura
Instructor Name from WEN: Yuichi Kitamura
Meeting Pattern (deprecated): TTh 2.30-3.45
Term Code: 202101
Category from Feed: YCQR
YCSO
Methodology
Core
