Economics of Uncertainty and Information

**Subject Code (deprecated):** ECON
**Course Number:** 411
**Section Number:** 01
**Description:**
Individual and collective choice in the presence of uncertainty and asymmetric information. Implications of such decision making for economic phenomena. Basic analytical tools for studying decisions under uncertainty. Asset markets, adverse selection, screening, signaling, moral hazard, incomplete contracts, bilateral trade with asymmetric information, and mechanism design.

**Instructor(s) from Econ Site:** Soenje Reiche
**Instructor Name from WEN:** Soenje Reiche
**Meeting Pattern (deprecated):** TTh 1.00-2.15
**Term Code:** 202101
**Category from Feed:** YCSO
**Microtheory**
