

Zoom: Enabling Screen Sharing for Participants

Screen sharing for Zoom meeting participants is disabled by default. This setting helps prevent uninvited attendees from disrupting meetings by sharing inappropriate or offensive material—a practice known as “Zoombombing” that has affected Yale and other institutions.

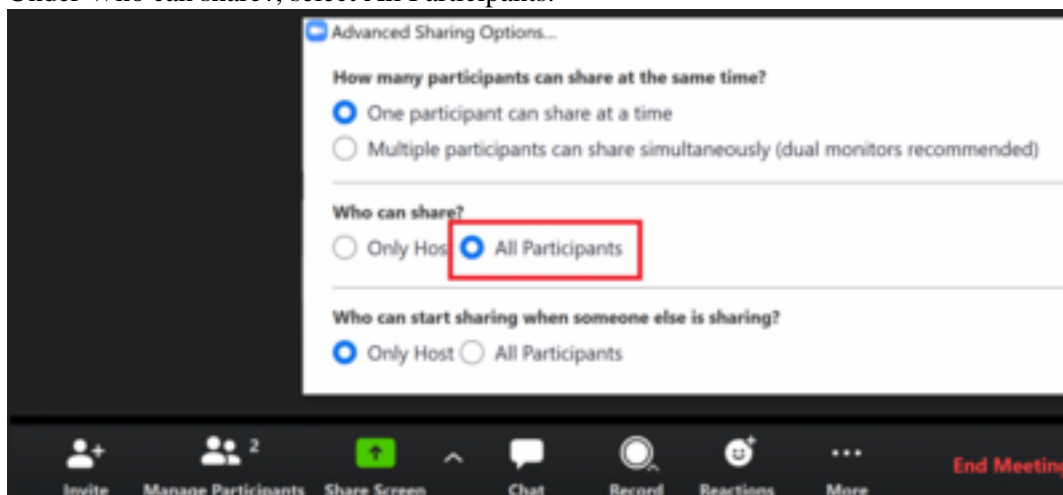

You can enable screen sharing for participants on a per meeting basis, or you can change your settings to enable participant screen sharing by default for all meetings.

Enable Participant Screen Sharing for a Single Meeting

1. Within the Zoom meeting, click the arrow next to Share Screen and select Advanced Sharing Options.

2. Under Who can share?, select All Participants.

Enable Participant Screen Sharing for All Meetings by Default

1. Visit yale.zoom.us, click **Sign In**, and log in with your Yale NetID and password.
2. Click **Settings** on the left-hand side of the screen.
3. On the **Meetings** tab, scroll down to the **Screen Sharing** heading. Under **Who can share?**, select **All Participants** and click **Save**.
