Econ 460a. Social Networks

Course Type: Undergraduate

Course term: Not offered

Year: 2013

Permission of instructor required

Introduction to the study of social networks. Methods draw heavily on game theory, but also incorporate approaches from other disciplines, including sociology, mathematics, and computer science. Applications include risk sharing and microfinance; job searching; the spread of information, fads, and diseases; supply chains; collusion; and local public goods.

Prerequisite: ECON 159.

Senior Economics majors may preregister for departmental seminars. Other interested students may enroll with permission of the instructor during the course selection period.

Semester offered: Not offered

Undergrad Course Category: Industrial Organization
Microtheory
